

Technical Bulletin

Model
6 Cyl.

Group
6

Subject

Heated Rear Window

Part Identifier
6493

Number
9503

ATTENTION: Service Manager / Service Technician

Models Affected: **911 Carrera / Carrera 4 Model Year 1995**

Concern: Information update

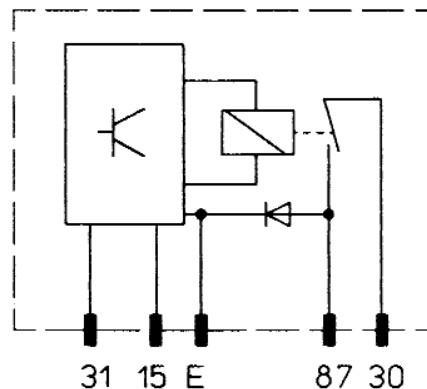

General Information:

The rear window defroster now has a single-stage heating system. When the system is activated via the dash mounted pull switch, (formerly a push-pull switch) the rear window defroster element is heated for 12 minutes and then automatically shut off.

This 12 minute heating cycle can be stopped at any time by pulling the on-off switch.

The control unit for this new system is still located on the electronic mounting board in the left rear engine compartment.

As with the previous style rear window defroster, when activated, the rear view mirrors are also heated. On cabriolet models, this pull switch only operates the heated rear view mirrors.

Important Notice: Porsche Cars N.A. Technical Bulletins are intended for use by professional technicians, not a "Do-it-yourselfer." They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Special tools may be required to perform certain operations identified in these bulletins. Use of tools and procedures other than those recommended in these bulletins may be detrimental to the safe operation of your vehicle. Properly trained technicians have the equipment, tools, safety instructions and know-how to do a job properly and safely. If a condition is described, do not assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your Porsche Dealer for information on whether your vehicle may benefit from the information. Part numbers listed in these bulletins are for reference only. Always check with your authorized Porsche dealer to verify correct part numbers. ©1995 Porsche Cars North America, Inc.
