

Technical Bulletin

Model
6 Cyl.

Group
9

Subject
Remote Sender Parts
Available Separately

Part Identifier
9073

Number
9506

ATTENTION: Service Manager / Service Technician

Models Affected: **911 Carrera, Carrera 4, Targa and Turbo**
Model Year 1996

General Information:

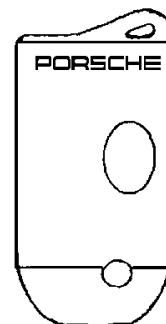

The remote sender with folding key introduced as of model year 1996 for the immobilizer anti theft system is serviced with replacement parts. The following replacement parts are available:

Lower part with folding key mechanism:
993 637 149 02 01C

Upper part with rubber button:
993 637 249 00 01C

Screw M2 x 12:
900 146 155 07

Battery 12 volt (Type A23):
PNA 611 105 00

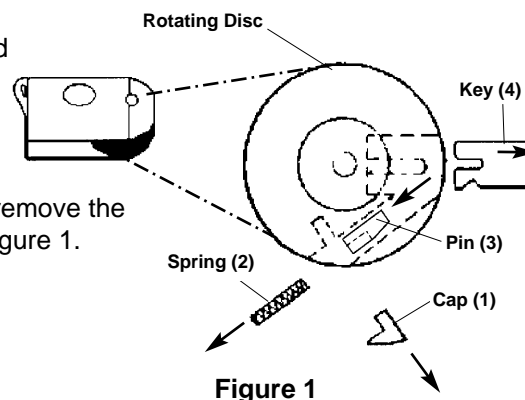

Repair Information:

Order only those parts necessary to repair the remote sender. **Do not order the complete remote sender, unless the transmitter circuitry has failed.**

Removing and installing key

Note: The rotating disc that retains the key is not removable. It is shown here only to explain the design of the key retaining mechanism.

If the lower part of the hand sender requires replacement, the key, if undamaged, must be removed and transferred to the new part. Before attempting to remove the key, study the drawing in figure 1.

Subject	Remote Sender Parts Available Separately	Part Identifier 9073	Number 9506

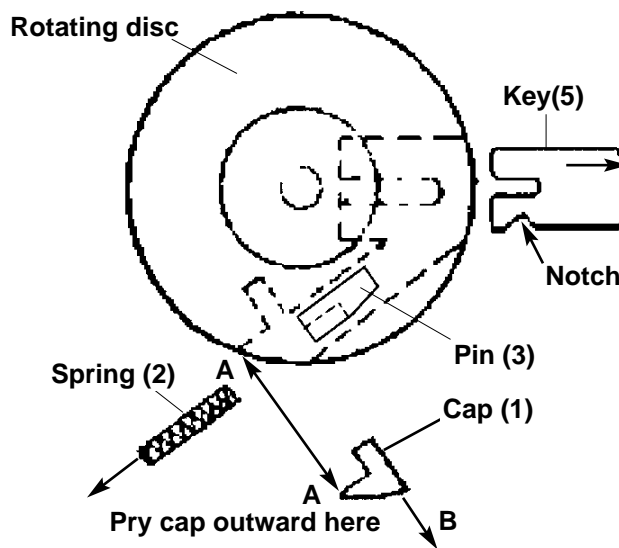

Figure 2

Key Removal:

- Move the key to the fully open position.
- With a small screwdriver (1.4mm), lever the cap (1) out of the rotating disc at arrow A in the direction of arrow B. Be careful not to damage the opening for the cap.
- Remove the spring (2).
- Use a small screwdriver to disengage the pin (3) outward from the notch in the key (5). **The pin does not need to be fully removed from the rotating disc.** Afterward, remove the key. The pin must disengage the notch in the key (5) before the key can be pulled out. Do not attempt to pull the key out before the pin (3) has moved outward.

Key Installation:

- If the key is being transferred to an assembled new lower housing, no disassembly of the new lower housing is required. Press the key into the rotating disc until the pin engages the notch in the key.
- If a replacement key is being installed into an old housing, reassemble the spring and cap into the rotating disc. Be certain the spring enters the recess in the pin. Press the key into the rotating disc until the pin engages the notch in the key.

Important Notice: Porsche Cars N.A Technical Bulletins are intended for use by professional technicians, not a "Do-it-yourselfer." They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Special tools may be required to perform certain operations identified in these bulletins. Use of tools and procedures other than those recommended in these bulletins may be detrimental to the safe operation of your vehicle. Properly trained technicians have the equipment, tools, safety instructions and know-how to do a job properly and safely. If a condition is described, do not assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your Porsche Dealer for information on whether your vehicle may benefit from the information. Part numbers listed in these bulletins are for reference only. Always check with your authorized Porsche dealer to verify correct part numbers.
