

PORSCHE

1997 Model Range Information

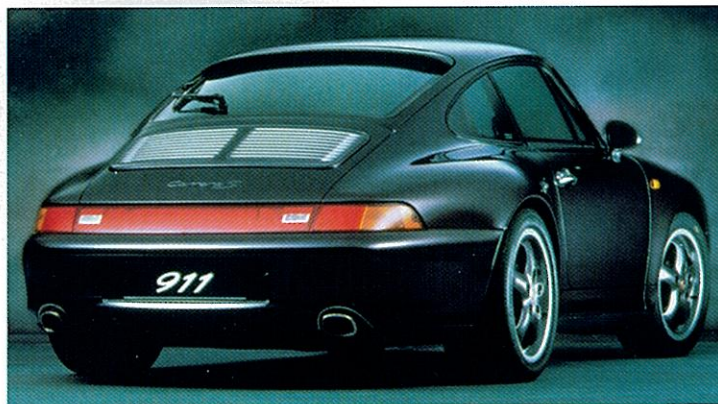

Under the extended wheel arches lie 17 inch 'Cup design' wheels with spacers and ultra low profile tyres. Its competitive character is further underlined by the lowered suspension and widened track of the rear axle. Such performance orientated adjustments produce outstanding roadholding and position the Carrera S as a pure driver's car. Its stylish interior is equally desirable with leather trimmed door and dashboard panels contrasted by a steel grey gear lever, handbrake grip and instrument rings. You can choose Vesuvius Metallic, unique to the Carrera S, at no extra cost. This meticulous paint finish blends perfectly with the steel grey door mirrors, handles, divided rear spoiler grille and wheel rims to create a stunning visual effect.

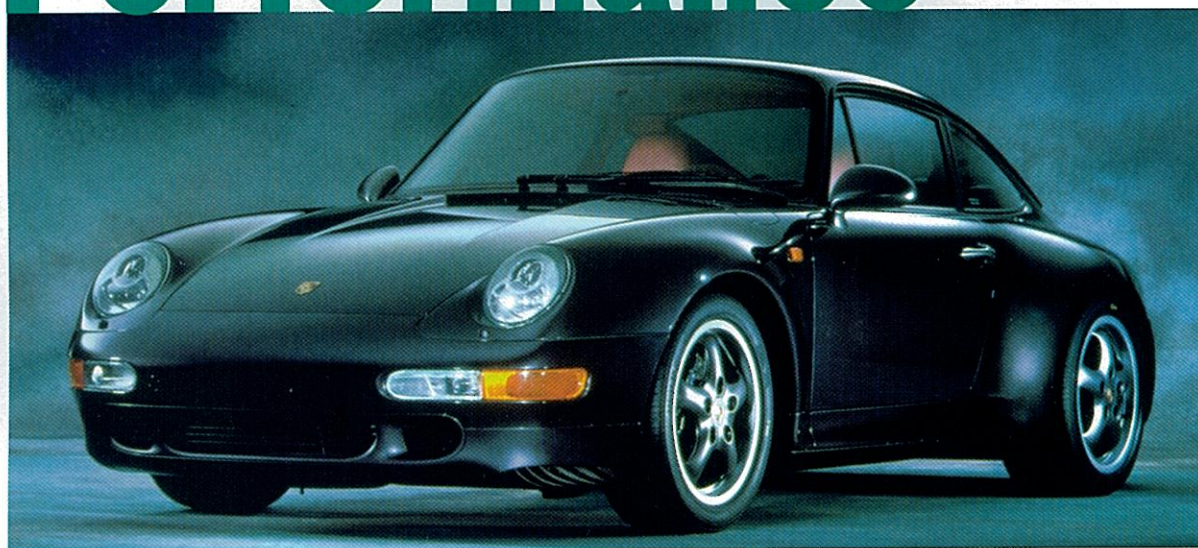

The 911 range heralds the arrival of the Carrera S. A true sportscar that shares the wide body styling of the 911 Turbo and 911 Carrera 4S.

Whilst the flared wheel arches are a nostalgic reminder of Porsche's classic styling, a drive in the new Carrera S will emphasise its racing heritage.

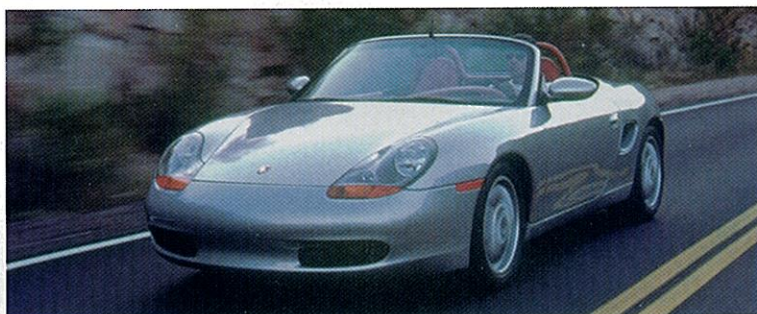

Performance

911 Carrera

Boxster

Technical Data	
Engine Capacity	2480 cc
Max power	204 bhp/6000 rpm
Max torque	245 Nm/4500 rpm

911 Turbo

Tiptronic S provides fingertip gearchanges from its Formula One style steering wheel switches, allowing full concentration on the road ahead. The clutchless gearchange could not be easier to operate and provides the full involvement of manual selection. Should you prefer a more relaxed drive, simply select the automatic option with Intelligent Shift Programme. This ingenious system senses your driving style and chooses an appropriate shift pattern from the five programmed settings.
