## Remote Sender / Folding Key Conversion

Vehicle Type: **911 Carrera**

Model Year: **1995 - on**

Information: As of Model Year 1996, Porsche vehicles were delivered with a remote hand sender with integrated folding key. Inquires have come from the dealer organization concerning conversion of the folding key to the previous separate key and remote hand sender as used in the 1995 911 Carrera.

It is possible to convert the folding key / hand sender assembly to the previous version separate hand sender and key. The circuit board of the folding key remote sender can be transferred directly to the previous version remote sender housing. The key can be removed from the folding key housing and installed into a separate key head.

Be sure that the circuit board is correctly installed over the locating pin into the housing. Otherwise the housing halves will not close correctly.

Refer to the 993 Workshop manual Volume 6, page 90-11 for folding key servicing instructions.
