<b>Subject</b>  <b>Oil Fill Pipe Bellows</b>		<b>Part Identifier</b> <b>1715</b>	<b>Number</b> <b>9603</b>

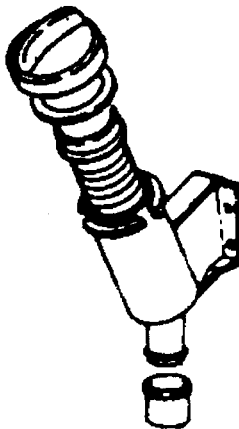

**ATTENTION: Service Manager / Service Technician**

**Models Affected:** **911 Turbo Model Year 1996**

**General Information:** As of June 1996 production, 911 Turbos have a longer oil fill bellows installed in the oil fill pipe. The new oil fill bellows is 40 mm longer than the former version and improves the oil filling characteristics of the engine.

**Repair Information:** It is recommended to replace the former version bellows when the vehicle is in the repair shop for maintenance or repairs.

The former version oil fill bellows can easily be removed by pulling it out of the oil fill pipe. When installing the new version oil fill bellows, place the end that is wider and slightly curved in the oil fill pipe first and press into the fill pipe.

**Parts Information:** 993 207 363 50 Oil Fill Bellows (approx. 210 mm - 225 mm long when stretched)

**Important Notice:** Porsche Cars N.A Technical Bulletins are intended for use by professional technicians, not a "Do-it-yourselfer." They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Special tools may be required to perform certain operations identified in these bulletins. Use of tools and procedures other than those recommended in these bulletins may be detrimental to the safe operation of your vehicle. Properly trained technicians have the equipment, tools, safety instructions and know-how to do a job properly and safely. If a condition is described, do not assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your Porsche Dealer for information on whether your vehicle may benefit from the information. Part numbers listed in these bulletins are for reference only. Always check with your authorized Porsche dealer to verify correct part numbers. ©1996 Porsche Cars North America, Inc.
